CCC and Injury Sciences Expand Relationship

Extended relationship will increase insurers' ability to review claim information for fraud

Chicago and San Antonio, TX – May 15, 2007 – CCC Information Services Inc. and Injury Sciences LLC have expanded their relationship to help insurers quickly and easily review claim information for potential fraud. Injury Sciences is a leader in providing claims professionals with objective, scientific information for use in evaluating auto-related claims. CCC is a leader in technology and information services to the auto-claims industry.

Through the extended relationship, Injury Sciences will leverage its existing interfaces with CCC in order to provide insurance customers with a broader suite of science-based solutions. These solutions analyze claim data to help insurers better understand how accidents and injuries occur, impact severities and assess potential for fraud.

"CCC is excited about its relationship with Injury Sciences and the solutions we are offering to our customers," said Michael Croxton, senior vice president, Marketing and Product Management, CCC. "This relationship will give insurers seamless interfaces between their claims files and advanced evaluation services to reconstruct accidents, assess potential for fraud and better manage loss costs."

Opportunistic fraud and inaccurate liability assessments increase loss costs. According to Fast Track Private Passenger Auto data for the year ending December 31, 2006 average loss costs were up compared to 2005 with increases of 3.2 percent and 3.7 percent for Collision and Property Damage Liability claims respectively.

Scott Palmer, President and CEO of Injury Sciences states, "We are very pleased to grow our relationship with CCC. Its broad customer base will enable us to deliver our unique analytics to insurance companies looking to better understand the vehicle dynamics of its auto accidents and avoid overpayments related to fraudulent and opportunistic claims."

About Injury Sciences LLC

Injury Sciences LLC is headquartered in San Antonio, Texas, and is the leader in software and services which provide claims professionals with objective, scientific information for use in the evaluation of an auto claim. Injury Sciences' software and services are the result of over 18 years of research and analysis of vehicular collisions and injury outcomes. Injury Sciences' team of leading forensic scientist has conducted extensive research regarding human response to auto collision events. Many of these studies have been published in peer-reviewed scientific publications and are internationally recognized and referenced in the scientific community. Injury Sciences software and services are currently used by more than 50 different insurance carriers. For more information, visit the company's website at www.injurysciences.com or contact Joe Jensen of Injury Sciences at 830-868-2589.
