

ChoicePoint Enters Strategic Alliance with Injury Sciences LLC to Help Reduce Insurance Claims Losses

ALPHARETTA and SAN ANTONIO February 25, 2008 -- ChoicePoint® (NYSE: CPS) and Injury Sciences LLC today announced a strategic alliance which will enable insurers to reduce total claims losses while enhancing operating efficiencies through the use of their combined predictive modeling and forensic intelligence solutions.

- ChoicePoint is a premier provider of data-driven analytics solutions that insurers use to imbed automated business intelligence within existing claims processes to identify potential fraud, leakage, and subrogation recovery opportunities.
- Injury Sciences is the leader in the forensic analysis of material damage estimate and event data recorder (EDR) information, which are used to scientifically evaluate injury causality, severity and verify accident facts.

Through the strategic alliance, a combined solution will provide insurers with access to ChoicePoint's data-driven analytics solutions and Injury Science's forensic analysis tools via a single interface.

"Injury Sciences is very excited about our alliance with ChoicePoint," said Scott Palmer, President and CEO of Injury Sciences. "Integrating ChoicePoint's robust analytics platform with Injury Sciences' Crash Severity Scoring™ and EDR Triage™ capabilities will provide insurance customers the ability to identify claims that require additional attention and review based on the auto accident forensics with more precision, effectiveness, and consistency."

"At ChoicePoint, we are always looking to partner with quality analytic solution providers that complement our suite of fraud, subrogation and severity services," said Peter Lynch, ChoicePoint's senior vice president of Claims Solutions. "We believe that the synergies of ChoicePoint's analytics capabilities and Injury Science's forensic intelligence will create benefits that continuously improve claims workflow and claims outcomes for our shared clients."

About ChoicePoint:
